**Starting with the Class of 2020, the process to secure post-graduate outcomes was changed to be in alignment with NACE standards and protocols. This shortened the overall data collection window from approximately one year to six months post graduation*

Knowledge Rate is the percentage of graduates for which a survey response was received or information was secured. Post-graduate data are collected from surveys, internal research/canvassing, social media, and the National Student Clearinghouse in accordance with NACE standards
